ABOUT ME

I'm a senior in programming languages as: PHP, JavaScript, Ruby. Also have good skills in HTML, CSS.

Have big experience in working with frameworks for PHP: Yii, Yii2, Symfony 1.4, Symfony2+, Codeigniter, Laravel and Zend.

Developed some bundles for Symfony and a small library for Angular. Check out on my github <https://github.com/gatmanmihai>

Have good knowledge in Angular2+ and AngularMaterial. Developed a couple of apps on it.

Version Control: worked with GIT and SVN.

I'm doing good in teamwork. Can quickly understand code written by someone else.

EXPERIENCE

Web Developer

Freelancer

Since 2013 Chisinau (Moldova) Freelancer

- Developed Redmine plugins on RubyOnRails
- Migrated a PHP based webapp to Ruby. RubyOnRails framework was used for this. Main purpose of the app was sending sms-es. Beside frontend, there also was a backend part for administration and statistics for the users.
- Started and developed the <http://iticket.md/> project till it start. Then I quit but remained in support for very exceptional situations
- Developer for <http://maxi-booking.com/>. Project was written on Symfony2
- Developer for <http://starofservice.com/> written on Symfony 1.4
- <http://www.chollazovijajes.com/>. This project was developed by me with a friend on a private framework. When project was live, we quit. Client decided to hire a local developer for support
- Developed a Payment Gateway for WordPress for <http://comet-shop.com/> that is accepting payments through <http://www.victoriabank.md/>
- <https://partnerconsulting.ru/> App was developed with Symfony3 framework. Later migrated to Symfony 4
- <https://photoskill.net/App> was developed with Symfony3 framework. Later migrated to Symfony 4

Full stack Developer

Best4u Development

Since July 2018

- Was responsible for developing an App based on Angular6 as Frontend and Symfony4 in backend as an API. Was used AngularMaterial to achieve a Mobile friendly UI/UX
- 4Suites Project - working as a full stack developer / team lead. Responsible for integrating new technologies.
- System architect. Working on migrating old monolith application to a new Microservice based architecture.

Web Developer / Team Lead / Project manager

Youmesoft IT

April 2015 to March 2018 Chisinau (Moldova) Full-time

- Developing 2 Apps: Frontend based on Angular and backend as API on Symfony 3.4
